### School Report.

The following report of the schools in Laconia, for the past year, is respectfully submitted to the citizens of the town.

In District No. 1, there have been maintained

four departments of school of three terms each. Female teachers only have been employed.

Without detailing particulars, suffice it to say that the schools have all been remarkably successful in every respect, and are far in advance of what they were one year ago.

Doubtless their progress in a measure, and perhaps largely so, is attributable to the system under which they are now operating.

The Board of Education, consisting of six persons, chosen by the District, in accordance with a special act of the last Legislature, have carefully graded the schools, arranged a course of study adapted to each grade, adopted regulations for the government both of the teachers and pupils, and thus far have enforced a rigid observance of the same.

Already the good results of this system are to be seen in a more punctual daily attendance of the pupils at school, and the very few instances of tardiness, in comparison with former terms. There is also manifested on the part of most of the pupils an increasing interest to be present at each recitation, and thoroughly understand every topic gone over by the class, thus showing they are mindful of examination day, which decides who is to pass from that to the next higher grade. It is sufficient to say the schools under this system, are doing all that could reasonably be expected.

In District No. 2, in the Grammar and Intermediate departments there have been three terms of school and in the Primary one term. The teacher who commenced the summer term in the Grammar grade, was soon obliged to leave the school on

account of the sickness of her mother and return home. Mr. Vittum was hired in her place, and has continued in the school ever since, and we are happy to say has proved himself to be an efficient and successful teacher. The other two grades have both been taught by female teachers, whose large experience has contributed much to their successful labors during the past school year. The schools have been very satisfactory and the Committee feel like congratulating the District upon their success.

In Districts No. 3 and 5, there have been two terms of school each, taught by female teachers.

In District No. 5, we were not present at the close of the winter term but from Mr. Wadleigh School Committee of Meredith who was present, we are informed that the school appeared well and the manner of the different recitations, showed the pupils had received thorough and practical drill in all their studies.

In District No. 3, the schools have been fully up to the average in point of excellence. There has been a decided improvement in this respect, that there have been only about half as many classes as there was last year, thus affording teacher and pupil more time for each recitation.

In District No. 4, there has been only one term of school. The record of the school is good, comparatively few instances of tardiness or absence.

The Committee do not deem it necessary to remark especially concerning any of the schools, it is enough to say they have generally been more than ordinarily successful.

C. F. STONE, }  
K. S. HALL, } School Committee.

# **STATISTICAL TABLE.** **Summer Schools.**

No. of District.	Grade of School.	Names of Teachers	Wages per Month.	Length of School in Weeks.	Whole No. of Pupils.	Average Attendance.	No of children attending to the following studies.
